BORDERLINE OWNER'S MANUAL

Copyright - 1981 by SEGA/Gremlin, All Rights Reserved

INTRODUCTION

BORDERLINE is an electronic game that makes extensive use of digital integrated circuitry and television monitor concepts. This manual is designed for the maintenance technician who possesses a general knowledge of solid state circuitry, microprocessor and digital integrated circuitry and TV monitor concepts. Any individual not knowledgeable in these areas should not attempt repair of the electronic portion of the game. If you have any questions not answered in this manual, call SEGA/Gremlin Customer Service, 800-854-1098.

GAME SET-UP AND INSPECTION

1. Inspection

Before plugging in your new game, inspect it closely to spot any possible shipping damage. Check to ensure the graphics are in place, the monitor is not damaged and that the overall cabinet is in good condition. Open the rear access panel and inspect the inside of the game. Be sure no components or connectors have come loose. Proper connector fittings must be checked before game power is applied. Check all related connectors for good contact. Although disconnected are easily spotted, poor contacts are difficult to locate. The connectors should therefore be pushed in firmly and then loosened to spot poor connections. Check to ensure the fuses are intact. There are three fuses (not counting the monitor fuses). They are located on the power supply.

2. Important Notes

The following note is included in compliance with FCC rules:

WARNING: This equipment generates, uses, and can radiate radio frequency energy and if not installed and used in accordance with the instruction manual, may cause interference to radio communications. As temporarily permitted by regulations, it has not been tested for compliance with the limits for Class A computing devices pursuant to Subpart J of Part 15 FCC Rules, which are designed to provide reasonable protection against interference in which case the user at his own expense will be required to take whatever measures may be required to correct the interference.

3. Miscellaneous

NEVER remove circuit board connections while the power is on.

NEVER replace any components with anything other than exact replacement parts.

DO NOT replace fuses with anything other than proper value. A blown fuse indicates an overload condition within the game. Replacing the fuse with a higher value can cause damage to internal components, if an overload occurs.

CORRESPONDENCE regarding this game should be addressed to:

GAME CONCEPT

BORDERLINE is a one or two player game in which players attempt to destroy enemy refineries and energy plants. The player moves through four different sectors, constantly under attack by enemy tanks, missiles, interceptors and drones.

Sector 1

The player is deep behind enemy lines, rolling his jeep down a corridor. He must dodge fire from interceptors, tanks and missiles. Drones will attack unexpectedly. The object is to reach and destroy the energy plants at the end of the corridor.

Sector 2

Once through the corridor, the player enters a field that contains two sections of dense underbrush patrolled by drones. The drones will only enter the underbrush in one place, then follow in the path the player's jeep makes. The player must make a maze through the underbrush and proceed to the top and destroy the energy plants.

Sector 3

In this sector, enemy tanks come down from the top, near the refineries, and drones enter from the side. The player must outmaneuver the enemy and destroy the refineries at the top.

Sector 4

Again, there are two sections of underbrush, this time separated by walls. Drones enter from the sides. They will break the wall once, but not twice and will follow in the path made by the player's jeep. In the upper section of underbrush, is the energy plant. This time protected by revolving armament, in addition to tanks. The object is to destroy the energy base. Players alternate at the destruction of each jeep. The game ends when all jeeps are destroyed.

BORDERLINE OPTIONS SELECTION

OPTION	SWITCH	1	2	3	4	5	6	7	8
3 Jeeps		On	Off	Off	X	X	X	X	X
